

 **insula**  
ARCHITETTURA E INGEGNERIA

## THE PRACTICE

 **insula** architettura e ingegneria s.r.l. is an engineering, architecture and urban planning practice based in Roma that was established in 2002 by Eugenio Cipollone, Paolo Orsini and Roberto Lorenzotti.

The firm has completed projects throughout Italy, where the complexity of the existing architecture and its interpretation play a leading role in the design process.

**insula** is currently undertaking work in Germany and Turkey which has led to the opening in 2012 of the new Istanbul office.

The firm is able to manage a wide range of projects - from urban planning to interior design - with the capabilities of coordinating a variety of skilled teams and consultants and to supervise all the phases of the design process - from feasibility studies to site supervision.

**insula** constantly seeks the improvement of its full range of skills and capabilities to offer its clients cutting-edge innovations in design.

The firm regularly participates at the National Architectural Debate by leading workshops and giving lectures on architecture and urban planning.

**insula** projects had been published in many specialized magazines.

**insula** has certified its quality management system in accordance with the requirements of the UNI EN ISO 9001:2008
